Never get Ticks

Put organic,cold-pressed,unfilterd apple cider vinegar (Omega brand)in your drinking water,and in all you animals water. Parasites,ticks, chiggers and Fleas hate it. It helps with hydration in the summer,is a great source of potassium,and is good for your scalp if you rinse your hair with it once a week. About a cap-full to a 2 liter jug works best, and about a teaspoon in the dog's water bowl. Your animals might not like it at first but they will get thirsty and start drinking it with no problems.
